

# Forecourt Control Module

- **Improved Security**
- **Faster Customer Service**
- **Higher Through Put**
- **Accurate Customer Accounts**
- **Integrated High Speed Chip&Pin, Etopup and Weighted Product**
- **Local in-house System Support and Software Development**

The Forecourt Module provides a fast and easy way to control and monitor your forecourt. Our Integrated high speed Chip&Pin and E-Topup services reduces the bottlenecks and will deliver in excess of 8,000 litres of fuel per pump, per day. The fuel forecourt module allows fuel pumps to be controlled from each touch screen POS terminal via the Doms PSS 5000.

- The PSS 5000 forecourt controller is a combination of more than 17 years of experience and the latest technology
- With 31,000 sites it is one of the most widely used forecourt controllers in the world.
- Doms is part of Gilbarco Veeder-Root a leading global provider of retail and commercial fuel dispensers.

Pump Status is visible at all times to POS operators so they can:

- See all outstanding sales
- Authorise the dispensing of fuel.

The Pump status can be made available at all Pos terminals or restricted to specified terminals depending on forecourt requirements.

### Swipe / Select Operator

CALLING				
FUEL SALE				
Pump1 £ 19.97:Diesel	Admin	Andrew	Diane	James
Pump2				
Pump3	Joanne	John	Justin	Kerrie
Pump4 £ 27.87:Diesel	Lyndsey	Mark	Michael	Michelle
Pump5	Rachel D	Rachel S	Sherry Ann	Manual Sign On
Pump6				

- Fuel Sale buttons are displayed when operator "signs on".
- Tapping a "Fuel Sale" button transfers the fuel sale to the current sale and remove it from the pump.
- Dispensing of fuel can be authorised via POS terminal at all times.
- All transaction electronically recorded (operator, date, time, sale details)
- CCTV Integration available
